

## **Installing LapSim**

- Please copy the File LapSimInstall.exe in a newly created directory on your hard disk, preferably C:\LapSim. Do not make a directory in the C:\Programs Files\ folder, because than may cause problems with the loading routine.
- Double click on LapSimInstall.exe  
=> File will self extract and will install the Matlab compiler Runtime2013b
- You are asked to accept Microsoft Visual C++ License Agreement (This is not asked on every computer. Do not ask me why)  
=> Yes
- You are asked if you wish to install MatLab Compiler Runtime  
=> Next

=> Default path for installation:  
"c:\Program Files\Matlab\Matlab Compiler Runtime"

- Click Install
- When message comes: MCR Installation complete  
=> click Finish

(Due to the duration of procedure it might be that a Failure Message appears that extracting MCR Files is not responding => no action required, just wait)

- Double click on LapSim.exe => LapSim will start

## **For Licensed versions:**

- Go to the CCD1 subdirectory in the folder you created to install LapSim. Double click on WkRunTime.exe to install the WibuKey driver in order to communicate with the hardware dongle.

=> You are ready to go
