

Scrutineering Configurator and Tool

- ▶ Verification of the ECU software content
- ▶ State of the art Hash algorithm SHA-256

The Scrutineering Configurator and Tool is a software package developed for teams and OEMs to validate the software content of Bosch Motorsport ECUs.

The Scrutineering Configurator creates the reference file required to check the software status of a control unit. All you need is a template file and the Bosch control unit prepared with the correct software. The template file can be configured and is provided by Bosch, please contact Bosch. The Scrutineering Tool checks the content of a control unit against the reference file.

Scrutineering Tool standalone

If you do not need the configurator and only want to work with the scrutineering tool (e.g. marshal or team), you can order the tool separately. You will need a license number to activate the tool, which we provide free of charge.

Technical Specifications

PC Environment

- IBM PC Pentium/AMD Athlon compatible, min. 1.6 GHz
- Min. 2 GB RAM
- Min. 1 GB free hard disc space

VGA/WGA monitor (min. 1,024 x 768)
